

*creating a passion for lifelong learning*

*Our mission is to offer early education experiences that instill a respectful global view and a passion for lifelong learning.*

The Montessori program offers consciously designed experiences that cultivate the child's sense of independence, self-respect, love of peace, passion for self-chosen work and the ability to celebrate the individual spirit. Our program seeks to promote a global perspective and a respect and understanding of cultural diversity.

Montessori teachers lead children to ask questions, explore and discover in an atmosphere of independence within a community. The foundation of Montessori education is about creating a passion for lifelong learning by allowing children to explore topics that capture their interests and to share their discoveries with classmates.

*learning life skills one  
discovery at a time*

# BEAVER VALLEY MONTESSORI SCHOOL

**The Beaver Valley Montessori School** is a state licensed, nonprofit preschool for 3, 4, and 5 year olds serving Beaver County. Our school provides a unique approach to education, embracing the “Entrepreneurial Spirit” that we share with your children every day.

The unique three year Montessori program can accept students beginning at 2.7 years of age and creates a strong foundation of learning that will set the stage for challenges they may encounter later in school and in life. We have relationships with a respected day care facility and offer tuition assistance as needed.
